

## **Alliance Engineering Awarded Three Compressor Station Projects from Boardwalk Pipeline Partners**

**HOUSTON, August 20, 2009** – Alliance Wood Group Engineering (“Alliance”), part of international energy services company John Wood Group PLC (“Wood Group”), has been awarded three contracts from Boardwalk Pipeline Partners, LP (“Boardwalk” NYSE: BWP) to provide engineering and design, project management, and procurement services for three natural gas facility projects in Louisiana.

The Castor facility, located in Bienville Parish, Louisiana, will be a booster station for gas entering Boardwalk’s 20-inch and 24-inch interstate natural gas Gulf South Pipeline network from another interstate pipeline. Castor will feature one CAT 3516 reciprocating engine driven Ariel compressor, providing approximately 1,300 HP.

Additionally, Alliance will design a grass roots facility adjacent to the existing Hall Summit compressor station, located in Bienville Parish, Louisiana. This facility will feature one Titan 130 compressor and one Mars 100 compressor which will bring approximately 35,000 HP of compression to their Gulf South Pipeline.

Alliance will also perform services for the horsepower addition at the existing Tallulah facility, located in Madison Parish, Louisiana, on Boardwalk’s Gulf South Pipeline. This features one Titan 130 compressor providing an additional 20,000 HP for Gulf South Pipeline’s 42-inch, 242-mile East Texas pipeline expansion.

“Alliance is pleased to be an integral part of Boardwalk’s expansion,” said Norb Roobaert, president of Alliance. “We have an exceptional relationship based upon Alliance’s streamlined and cost-effective solutions and we are honored that Boardwalk continues to utilize in Alliance’s competitive approach to compressor station engineering and design.”

**Alliance Engineering** provides highly optimized concept-to-completion custom engineering solutions for the oil and gas industry. The world’s biggest oil and gas projects demand talent, expertise, and innovation. Some of the largest and most visible projects in the world compose Alliance’s impressive offshore and onshore project portfolio. With an emphasis on quality initiatives and cost-effective engineering, Alliance has been on the cutting edge of engineering services for all customers worldwide. Alliance offers unique services and expertise for three energy market segments: Deepwater, Shelf / FPSO, and Onshore, with offices in Houston, TX and Denver, CO.
